

## 1. Use

earthBorn Herb and Resin Oil is an ideal primer for new wood inside and outside the home prior to waxing. It creates an elastic and breathable wood enhancing, and water resistant surface. It is porous and has pesticidal and fungicidal properties. Natural Thinners is a multi-purpose citrus-based solvent that can be used to dilute earthBorn oil-based products and clean tools. The product can also be used over earthBorn Emulsion to enrich the colour.

## 2. Colours and Product Codes

750ml Clear 1-3102

## 3. Coverage

12 – 15 sq m per litre on smooth wood of average absorbency (0.6 – 0.8 litre per sq m)

## 4. Preparation

The surface should be smooth, clean, dry, absorbent, dust & grease free

## 5. Drying time

This depends on temperature and humidity. earthBorn Herb and Resin Oil is touch-dry after approximately 3-4 hours. Allow 24 hours between coats.

## 6. Properties

earthBorn Herb and Resin Oil repels dirt and absorbs variations in humidity.

## 7. Application

Shake container thoroughly before use. The working temperature must not be below 5°C

As a wood finish, apply earthBorn Herb and Resin Oil liberally with brush or roller. Wait 10 – 15 minutes until the Oil has been absorbed into the wood then remove any excess with a paintbrush or lint-free cloth. 2-3 coats may be applied depending on absorbency. Very absorbent surfaces may need further coats. Allow each coat to dry completely before re-coating. Lightly sand, if required, before applying final coat.

To enrich the colour of earthBorn Emulsion ensure that the paint is thoroughly dry then apply a coat of earthBorn Herb and Resin Oil with a brush or roller.

## 8. Cleaning

Clean tools with earthBorn Natural Thinners

## 9. Storage

Keep containers tightly sealed and store in a cool, dry and frost-free place.

Unopened containers have a shelf life in excess of 2 years.

## 10. Safety

Please refer to Material Safety Data Sheets

## 11. Ingredients

Linseed Oil, isoparaffin, orange terpenes, natural essential oils.

*The user is recommended to test the product on the intended surface to ensure its suitability*
